

The European Commission's Science and Knowledge service The Joint Research Centre

Webinar of the IUVSTA Biointerfaces Division

With this webinar, gather information about the surface properties of nanomaterials!

The presentation will introduce the peculiarity of nanomaterials and nanoparticles highlighting the importance of a detailed surface characterization and analysis.

The problems related to the application of surface analysis techniques such as XPS and ToF-SIMS will be described.

Specific examples of sample preparation and analysis will be presented and discussed.
