

Webinar of the IUUVSTA Nanometer Structure Division

An Introduction to Nanoparticles : Basic Characteristics and Preparation

With this webinar, discover the fascinating world of nanoparticles!

The presentation will at first highlight the origin of the scientific and technological interest for nanoparticles.

A brief focus on the terminology as per ISO definitions will follow.

Then the various ways to produce nanoparticles will be displayed as well as the most relevant characterization techniques.

The webinar will end with an overview on UltraFine Particles, the 'natural' nanoparticles !
